This series takes a 'by-religions' approach providing full coverage of the six main world religions. Each pupil book follows the same three-part structure, and assessment activities are included at the end of each section. This book builds an overarching view of the essential elements, themes, and teachings of the worlds oldest surviving faith tradition Hinduism. Each theme is divided in easy to follow lessons. Highly philosophic content of Vedic chants is made simple enough for students as young as 5. For in-depth study, several appendices guide students into scholarly understanding of complex philosophic ideas such as the nature of reality, the nature of the mind, and the cosmic laws enshrined in the Vedic and post-Vedic texts. As a teacher with 20+ years

of experience, the author presents ancient wisdom in simple language. Many books have been written about Hinduism, many of them incomplete and confusing. This book will appeal to those seeking an easy to read, logical approach to both understanding and teaching Hinduism. The book will be useful to parents, grandparents, teachers and students alike. This student textbook provides a detailed commentary on the important Hindu scripture of the Bhagavad Gita, which is a dialogue between Arjuna the man and Krishna the God. Major Hindu concepts are examined in depth, and the background to the Gita is presented in a comprehensive introduction. Yoga is the key feature of the Gita, but it has its own interpretation of what that yoga should be. Thus, yoga features not only in each of the pathways of knowledge, desireless action, and devotion, but also in the way in which the divine is understood. The chapters of the Bhagavad Gita therefore describe Arjuna's despondency, followed by: The Yoga of Sankhya * Action * Knowledge * Renunciation * Meditation * Knowledge and Realization * The Imperishable Brahman * Royal Knowledge and Royal Mystery * Manifestation * The Vision of the Universal Form * Devotion * The Differentiation of the Kshetra and Kshetrajna * The Differentiation of the Three Gunas * The Supreme Purusha * The Differentiation of the Divine and the Demonic * The Differentiation of the Threefold Shraddha * The Yoga of Liberation and Renunciation. This book also contains detailed notes to the Gita chapters, a Further Reading section, a combined Glossary and Index of Sanskrit terms, and an Index of English words. The contents of the book are based upon the materials collected through extensive and careful research, for the preparation of a thesis for a higher degree for the Lancaster University. It deals with the conception of Hindu religion, its history and progress along with the gradual rationalization of the belief and practices with the time, since Rigveda and its effect on the caste system. Special attempt has been made to present many complex theological topics, in a simpler way for the easy understanding of the young generation, on whom the religion depends enormously, for its future growth and expansion. The vast amount of information has been accumulated here in a concise form to make it a useful reference book for the students of religious studies and sociology. There are very few brief and comprehensive expositions of the universal tenets of Hinduism available today, this book "The Primer of Hinduism" is to be welcomed as ably fulfilling the need in this respect. Both the modern Hindu who is brought up in an un-Hindu environment, and the followers of other faiths who want an authentic exposition of Hinduism is a short compass, would find this to be the book most helpful to satisfy their need. While the author calls the book a Primer, it is much more than that. It touches briefly on all the fundamental doctrines of Hindu religion and philosophy, and can very well form the basis of a detailed exposition of it suited to the needs of students at different levels of understanding. An Introduction: The purpose of writing the book is to provide a brief idea and knowledge about the various Vedic religious, rituals, practices, science, mathematics, beliefs prevalent in Hinduism. In short, to reveal the secrets of Hinduism. In India one should know that there were the intellectuals like rishis and saints and also tribals. The rishis and seers gave the written form of Vedas, Vedangas, languages, sciences, and all forms of knowledge. Sages and seers developed all faculties for Human knowledge, right from medicine to maths, philosophy, physics, astronomy and so on. The concept of re incarnation was one of the highest secrets of Hinduism and followed subsequently by other eastern religions. Though all were in pure Sanskrit it formed the base for the entire world to accelerate their development in all spheres of life. These were all introduced by seers in India through spirituality obtained from incessant meditation. The core practice is meditation. Since tribals living in India were accepted into the Hindu fold their practice still continues though reforms by Shankaracharya had its impact. These tribal practices were commonly criticized as a practice of Hinduism by westerners and other foreigners which is not true. Hinduism allowed their system also to flourish without much intervention. This book shall serve as an eye opener to all especially the younger generation who in the midst of their busy work may not have sufficient time to go deep into the Vedas and realize them. In whatever permissible context I have quoted the relevant portions of the Vedas and other texts to substantiate the authority of the writing. This book has also been written keeping in mind the innumerable NRI families and other foreigners belonging to various religions and cultures, across the globe, who would like to know about Hinduism and its secrets, and who at the same time have not been much exposed to its vast culture. Attempt has been made to analyse every topic to its semantics and explain to the reader for his understanding. Though India is divided by its language it is united by its culture which is Hinduism. However it must be noted that all Indian languages have their base in Sanskrit. The culture of religion was introduced by those ancient seers through epics, puranas emanating from the Vedas. Thus this culture is being experienced by the people in India called as Hindus. Hinduism has been a very tolerant society and over a period of civilizations has assimilated and welcomed many diverse cultures. Hinduism is not a religion in the strict modern sense, but is a composite culture. People living on the other side of river Sindhu were called as Hindus by the Persians (modern Iran) as they shared a common border with the ancient India (now in the region of West Pakistan). In the ancient Persian language they did not have phonetics or syllable for "sa or saa", hence instead of being called as Sindhus they called as Hindus. "The swastika the early symbol of Hinduism has been widely found in Neolithic European ruins during the past two centuries of archaeological excavations. This has convinced scholars during Past and present that prehistoric Europeans practiced an early form of Hinduism with high spiritual concepts of eternal soul, transmigration, karma, yoga, the third eye and the Nirvana" says Richard Cassaro, Journalist and speaker. Most of us living in the modern age, especially the younger generation, would not have a holistic idea of

the practices, science and technology prevalent in this culture especially from vedic times, and therefore this book is an attempt to impart and reveal in a nutshell of the wide beneficial practices prevalent in this ancient culture for the welfare of Humanity. Dilemmas surrounding the role for religious beliefs and experiences permeate the school lives of teachers and teacher educators. Inspired by the need for teachers and students to more fully understand such dilemmas, this book examines the relationship between religion and teaching/learning in a democratic society. Written for pre-service and in-service teachers, it will engage readers in thinking about how their own religious backgrounds affect their teaching; how students' religious backgrounds influence their learning; how common experiences of school and classroom life privilege some religions at the expense of others; and how students can better understand diverse religious beliefs and interact with people from other backgrounds. The focus is specifically on classroom issues related to religious understandings and experiences of teachers and students, and the implications of those for developing democratic citizens. Grounded in both research and personal experience, each chapter provides thought-provoking evidence related to the role of religion in schools and society and asks readers to consider the consequences of varied ways of responding to the dilemmas posed. Interfaith initiatives are increasingly prevalent on college and university campuses around the country. In large part, this trend responds both to ongoing religious violence throughout the world and to increasing religious tension in the United States. As such, these interfaith initiatives often attempt to bolster interfaith collaboration and increase awareness of different religious cultures, identities, beliefs, and traditions. In this book, Edwards reviews the various goals and processes associated with the interfaith movement, and offers both warnings and suggestions for those who are interested in pursuing an approach to interfaith dialogue that is oriented toward social justice. In doing so, this book fills a critical gap in academic literature surrounding the impact of religious identity and interfaith relations on pedagogy, educational experiences, and campus climates. Through three descriptive case studies set in a large public university in the United States, Edwards explores the use of Intergroup Dialogue as a pedagogical model for interfaith dialogue. While the goal of this pedagogy is to increase student understanding of privilege, oppression, and social injustice pertaining to religious identity, the cases in this book demonstrate how and why social justice oriented interfaith dialogue can be easily derailed and, if so, may potentially have harmful implications for religious minorities. Accordingly, Edwards offers five necessary conditions for assuring that social justice oriented interfaith dialogue (which Intergroup Dialogue is intended to be) succeeds. By focusing on the unique perspectives of four particular student participants (all of whom have religious identities outside of the three dominant Abrahamic religions) Edwards also highlights the experiences of those from religious identity groups that are the most overlooked and under-represented in the discourse on interfaith dialogue. Who Invented Hinduism? presents ten masterly essays on the history of religious movements and ideologies in India by the eminent scholar of religious studies, David N. Lorenzen. Stretching from a discussion on the role of religion, skin colour and language in distinguishing between the Aryas and the Dasas, to a study of the ways in which contact between Hindus, on the one hand, and Muslims and Christians, on the other, changed the nature of the Hindu religion, the volume asks two principal questions: how did the religion of the Hindus affect the course of Indian history and what sort of an impact did the events of Indian history have on the Hindu religion. The essays cast a critical eye on scholarly Arguments which are based as much on current fashion or on conventional wisdom as on evidence available in historical documents. Taking issue with renowned scholars such as Louis Dumont, Romila Thapar, Thomas Trautmann and Dipesh Chakrabarty on some central conceptions of the religious history of India, Lorenzen establishes alternative positions on the same through a thorough and compelling look at a vast array of literary sources. Touching upon some controversial arguments, this well-timed and insightful volume draws attention to the unavoidably influential role of religion in the history of India, and in doing so, it creates a wider space for further

discussion focusing on this central issue. Why don't Hindus eat beef? Why do Hindu women wear a dot on their forehead? Who is the Monkey God? Who's that God with the elephant head?
